Model HC-300 Hole Cutting Tool

Ridge Tool introduces the Model HC-300 Hole Cutting Tool. With 8" mounting capacity, the Model HC-300 effortlessly and accurately drills up to 3" holes for branching and servicing unpressurized pipelines.

The result of extensive pipe working professionals' feedback, the Model HC-300 offers great benefits that translate into unparalleled field and shop performance. The Model HC-300 is simply the easiest to use and most dependable hole cutting tool available:

- Two-piece design allows for quick mounting.**
 The Model HC-300 consists of separate base and power units that can be disconnected for easy mounting using a quick release mechanism.
- Light weight eases transport and operation.** With a total weight of only 31 lb., the unit can be separated in two lighter weight pieces for maximum field and shop versatility. This is particularly useful when working off a ladder, overhead or in tight quarters.
- Spring-loaded chain allows for single-hand latching.**
 The Model HC-300 features a patent pending spring-loaded chain that saves time and significantly aids set up and operation.
- Ergonomic design increases operator's effectiveness.** With all controls at the operator's fingertips, the tool has been designed for the operator's comfort and maximum productivity.
- High Speed cutting saves time.** With a powerful 1.2HP, 11 amp motor, the Model HC-300 delivers 360 RPM for fast cutting and maximum hole saw life.

With all these benefits and so competitively priced, the Model HC-300 is a work saver tool and the professional's choice.

The HC-300 is in stock.
